I. Introduction

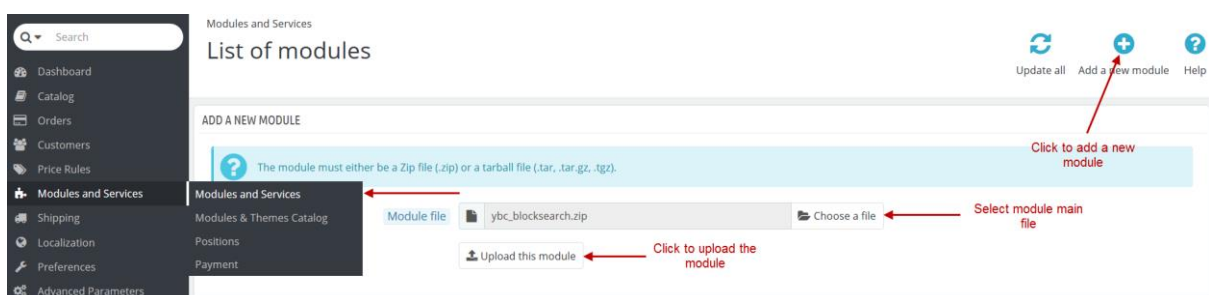

Are you a proud owner of a Prestashop online store? But do you think that you make use of the best available features to make more people attracted to your business? We bring you one such awesome module, **Prestashop advanced search module** which can be used to increase your store's functionality and make your store more user-friendly,

This is the best and the most advanced Prestashop search module you will come across in the market. And is the best alternative to replace the less functional search option found in Prestashop by default. This Prestashop search module consists of a responsive design with an eye-catching and user friendly user interface. Easy viewing of the products in search is supported by the Ajax search and by displaying product thumbnail image. Customer also has the option of choosing a category to search in. Purchase the Prestashop advanced search module to enjoy its benefits of advanced search right away!

II. Installation

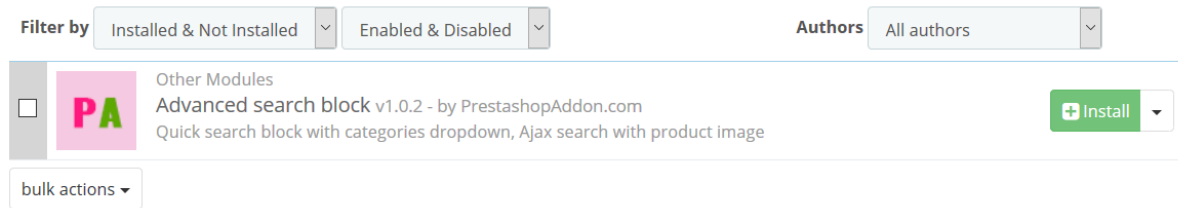

1. Upload the module to server

- Go to “**Modules and services**”
- Click “**Add a new module**”
- Choose module main file (ybc_blocksearch.zip)
- Click “**Upload this module**” to upload the module

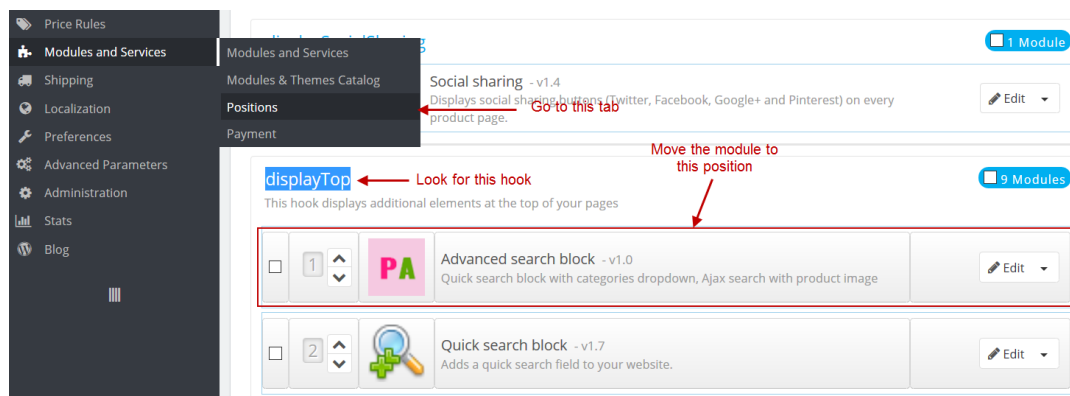

2. Install the module

Just click “Install” to enable the module

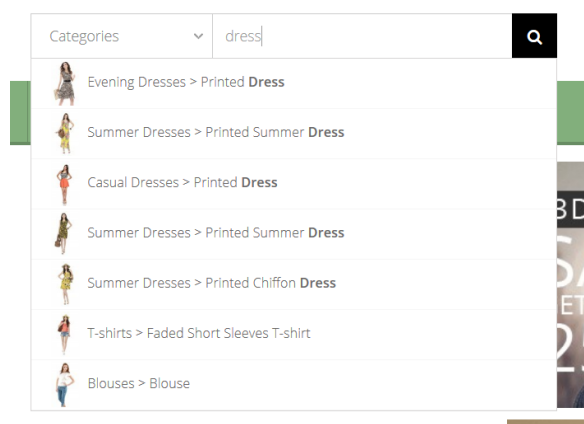

3. Module position

- Go to “*Modules and services / Positions*”
- Look for this hook *displayTop*
- Move our module to the position where the default *Quick search block* is

4. Check the module

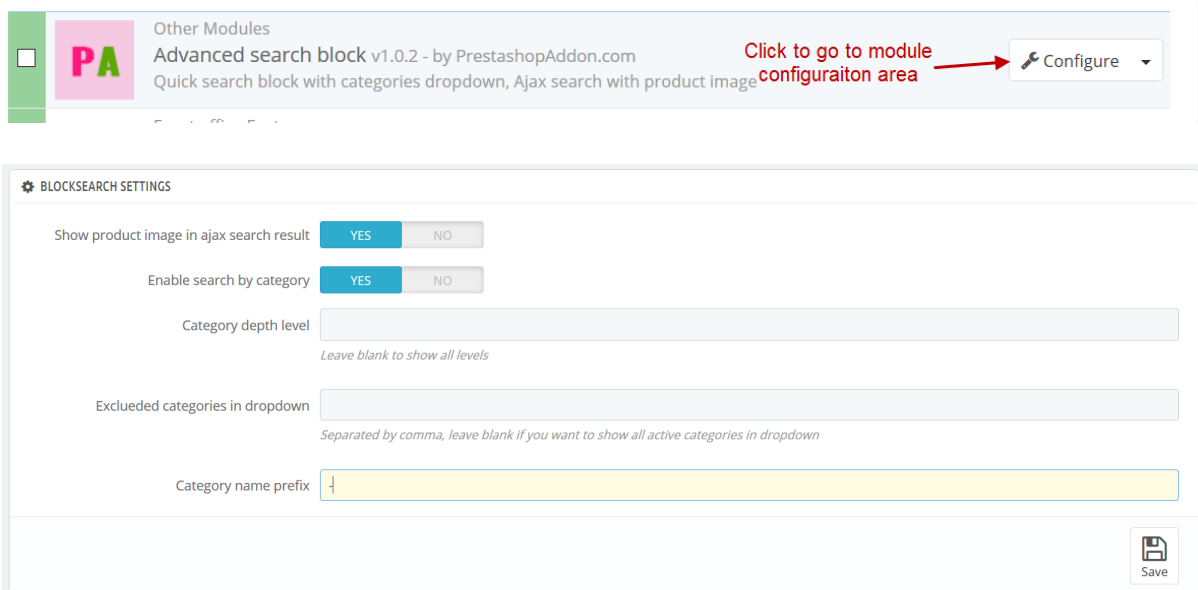

After step 1, 2 and 3 is done, you have completed the installation of the module. Now when you navigate to the frontend of your website, you will be able to see that your default Prestashop search module has been replaced by our new advanced search module.

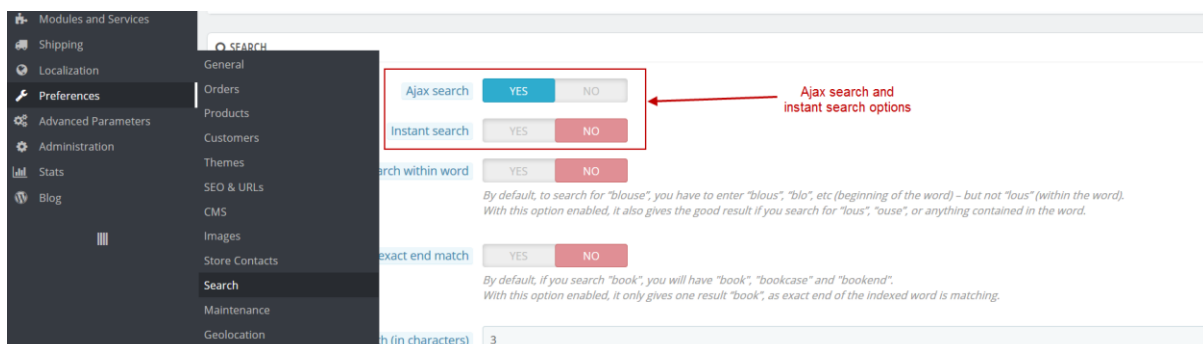

Congratulations! You are all done.

III. Module configuration

- In the module configuration area, you have options to setup the module according to your preferences and to suite your store:
 - Show or hide product image in ajax search result
 - Enable or disable search by category
 - Custom category depth level
 - Exclude specific categories in the category dropdown
 - Custom category name prefix

- You can also enable or disable Ajax search and Instant search. These options are available in “*Preferences/Search*”

IV. Thank you

Thank you very much for installing this module to your website. If you need any support, don't hesitate to contact us.
