I. Introduction

Are you looking to integrate a blog for your Prestashop website? You are at the right place. Our Prestashop blog, **Pretty blog** module is just what you need to have the perfect blog for your store.

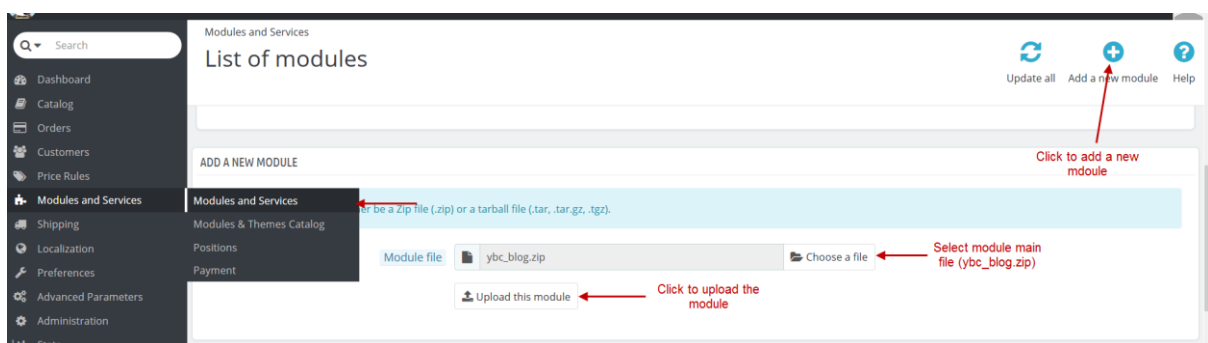

Pretty blog is the best and the most professional Prestashop blog you will find in the Prestashop realm. It is a module that thousands trust and use in their Prestashop website. So the best features are guaranteed. With an eye-catching user interface, multi-layout feature, multicolor skins, multi-language support the blog has the ability to attract the readers to the content. The Prestashop blog also has a responsive design which can be a great advantage in capturing the mobile community.

Our Prestashop blog module is easily customizable for any individual with less or no technical knowledge. It also has all the features for a website blog including a smart and friendly management system, SEO friendliness, comments, blog slideshow, blog gallery and many more.

II. Installation

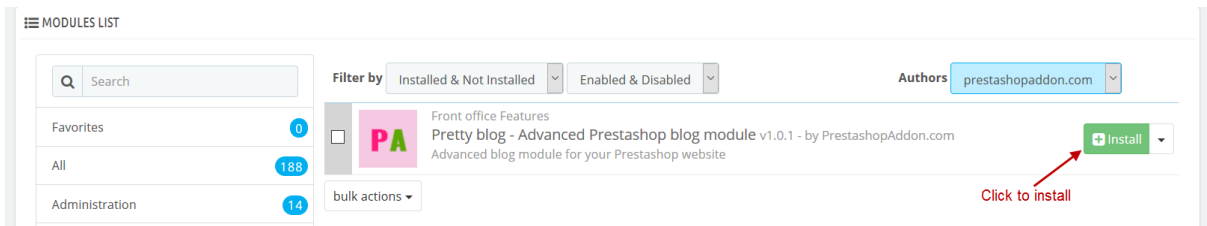

1. Upload module to the server

- Go to “Modules and services”
- Click “Add a new module”
- Choose module main file (ybc_blog.zip)
- Click “Upload this module” to upload the module

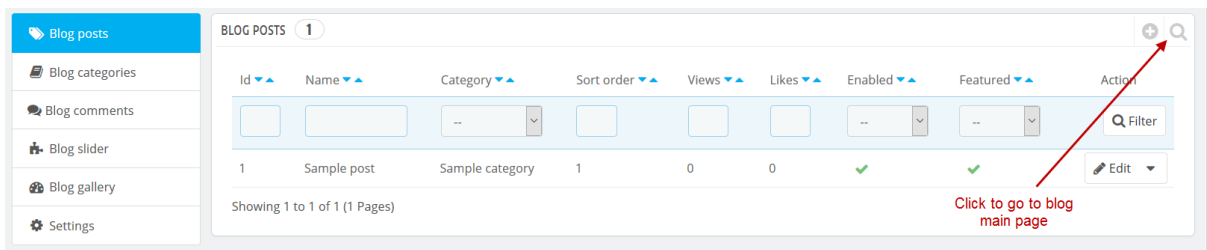

2. Install Pretty blog

Just click “Install” to enable the module

3. Check the module

After step 1 and 2 is done, you have completed the installation of the module. Your main blog page will be located at this URL: *http://yourdomain.abc/blog* or *http://www.yourdomain.abc/blog* (if you enable www. For your website). If you visit the link now, you will be able to see your nice Prestashop blog with sample data initiated.

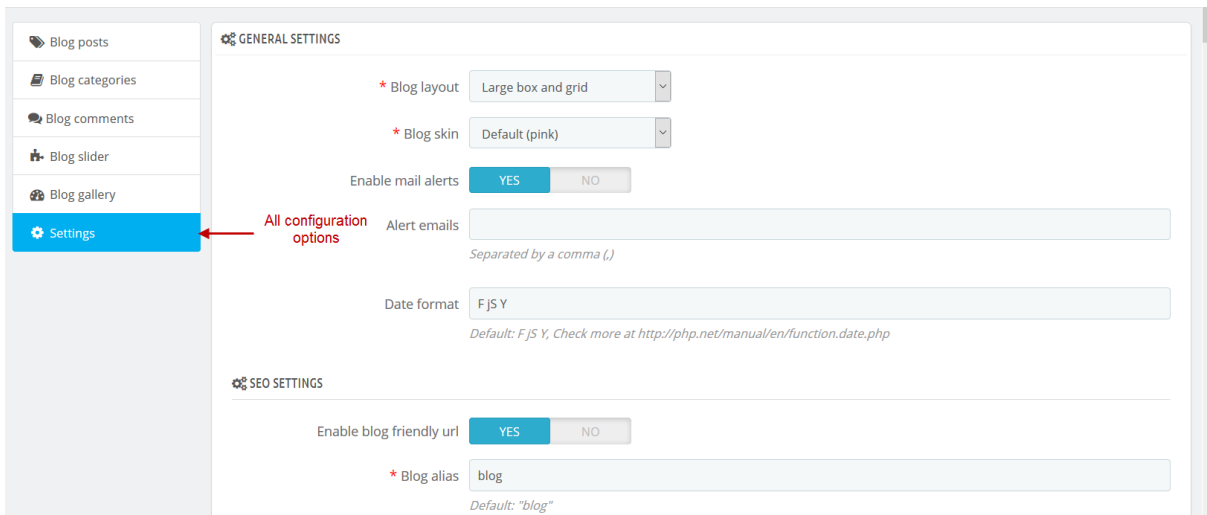

III. Manage your blog

After installing the blog module, now it's time for you to enter your blog content. There are several elements you will need to manage: Blog posts, blog categories, blog comments, blog slider and blog gallery. These are all very easy to understand and manage. When adding or editing these elements, just fill all the required and optional fields as necessary and follow the guide shown under each field.

***Tip:** When uploading images, try to use our recommended size to make the images display perfectly on the website.

IV. Settings

All configuration options are located in the “**Settings**” tab

*Tip:

- Choose a layout and skin that is suitable for your website. If you can't find a suitable pre-defined color for your website you can select "Custom color" and choose a better color from color picker tool.
- Enter your email to "**Alert emails**" to receive a notification every time a new comment is submitted or is reported as abusive.

V. Thank you

Thank you very much for installing this module to your website. If you need any support, don't hesitate to contact us.
